

**CLEAN VERSION OF REPLACEMENT PARAGRAPH**

3rd Paragraph, Lines 20-26, Page 1 of the Specification:

a' In many instances, pigments are added to molding compositions to achieve particular effects. These pigments are commonly added in either pure form or in the form of a dispersion (also referred to as a pigment paste). A typical pigment paste comprises pigment particles dispersed in a suitable carrier resin. Examples of suitable carrier resins are unsaturated polyesters having a low viscosity, such as described in U.S. Patent 4,009,225, and polystyrene resins having oxazoline groups, such as described in European Patent Publication No. 272,127.

**CLEAN VERSION OF AMENDED CLAIM 19:**

a2 19. A process as defined by Claim 12 wherein the reinforcing agent is glass fibers.
